

# PVC SHOWER PAN LINER

Liners manufactured by Singform Enterprise Shower pan liners are developed to be used for tiled shower construction, gang shower, steam rooms, or interior decorative water feature where the liner itself will be concealed from sun exposure.

Singform Enterprise produces shower liner membranes from 50% recycled and 50% new high grade PVC. The resulting product is a shower pan liner that is durable and puncture resistant while being flexible for ease of installation. Impervious to mildew, mold and bacteria. Manufactured in 40ft, 50ft and 80ft rolls. Custom length roll and precut sheets available on request. Extend liner width by solvent welding sheets together with PVC liner solvent.

- **Color:** Gray other colors available on request.
- **IAPMO file # 14122**
- **Finish & Markings:** Marked at 6in cut intervals along with manufactures' name, thickness, IAPMO logo, and ASTM D4551. With an embossed textured surface.
